

Campus Printing Made Simple

Reduce support costs.

Easy notebook computer and 802.11 printing.

Ideal for libraries, residence, computing labs and faculties.

The PrinterOn Campus Printing Service is a complete suite of technologies to make student printing easy and reduce the overall cost of print services. Once deployed, students can use any of the available printers from any device with little or no help from your support staff.

Save Money

Reduce your overall cost of supporting student print initiatives. Our solutions are designed to minimize or eliminate the need for staff intervention.

Simplify

The clear, simple web interface for the Campus Printing Service allows even novice users to print correctly the first time.

Innovate

Be a leader in student services - provide simple and reliable printing to any location, from any student computer, with the least amount of aggravation.

Print Less

With access control, auditing and print management integration, the Campus Printing Service can be a cornerstone of your environmental and fiscal print less initiatives.

802.11 Wireless

Introduction of Wi-Fi has exacerbated printing and support issues on campus. With 'print anywhere' and printer search facilities, PrinterOn puts it all under control.

Consolidate

Do you have several print management solutions? PrinterOn provides a single user experience compatible with all these

The screenshot shows a web interface titled "Step 3 - Document Information" for "Campus Printing". It features a "Select your document and options" section with a "Browse..." button, input fields for "Number of copies", "Page range", and "Release code", and a "SUBMIT" button. To the right, there are instructions: "Press browse to find a file on your disk, or enter / paste the URL of a web page." and "Default is 1 copy, maximum 10. Default is all pages. Sample ranges: 3 or 5-8. A 5 to 10 character string needed to release the print job." At the bottom, there are links for "Terms of Service", "FAQ", "Support", and "Log Out", along with the current user "kstevens@printeron.com" and the PrinterOn logo.

An Intranet print solution requires no print drivers and is an integral part of the complete Campus Printing Service.

Solutions for Higher Education

Library

- Provide a website for student printing without the installation of print drivers.
- Save time and energy otherwise spent helping students configure their notebook computers.
- Leverage our universal print driver for advanced printing. Install once, use anywhere, with any printer.
- Works with print management software for cost recovery using your campus card and vending systems.
- Students can print from home or residence and pick up their documents in the library.

Residence

- Provide centralized printing services for students who do not have printers.
- Support environmental initiatives and reclaim desk space by discouraging students from bringing a disposable inkjet printer to school. Shared lasers are more efficient, less expensive, and generate less waste.
- Give visitors to residence easy, managed access to printers - including guests at your summer hotel.
- Simplify printing from residence to libraries and other locations.

Campus

- Students can submit jobs to any printer, while connected at home or on campus.
- Connects to your directory servers for authentication.
- Use with or without print management applications for cost recovery.
- Single user interface for all print systems.

CyberCafé

- New, easy service for patrons.
- Works with campus vending systems.
- Simple printing at your CyberCafé.

Computing Lab

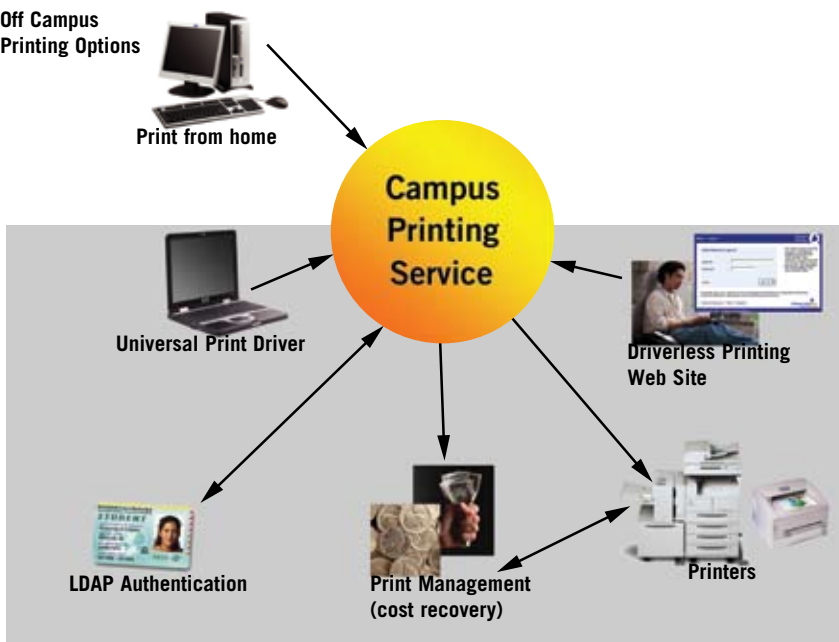

- Restrict or grant access to students enrolled in specific courses or programs.
- Optional release stations can reduce wasteful printing.
- Students can print assignments from anywhere on campus or at home.

CAMPUS PRINTING

Key Features

- Internet Capability** Allows support for printers at remote campuses, and lets users submit print jobs from home, residence, or elsewhere on campus.
- Authentication** Connect to your existing LDAP, NetDirectory or ActiveDirectory solutions to manage access to Intranet print features.
- Cost Recovery** PrinterOn has partnered with print management application vendors to ensure proper operations with your cost recovery solutions - using accounts, card systems or coin vending.
- Scalable** Add server applications as needed for robust, high-capacity deployments.
- Secure** Print data encryption and privacy release mechanisms support printing when sensitive data is involved.
- Printer Support** The Campus Printing Service supports a wide range of color or black & white printers, laser or inkjet. You can replace printers with different models without upgrading print drivers or user

Off Campus Printing Options

Components

The Campus Printing Service is a suite of applications and services that covers all student and faculty printing requirements. The key elements of the system are:

Intranet Printing

The Campus Printing Service includes a self-service web site that allows printing WITH NO PRINT DRIVERS. Simply authenticate yourself, choose a printer, set print options, and upload the document to be printed.

Universal Print Driver

Users with advanced printing requirements can download and install a single print driver that works with all of your configured printers. It even includes a search mechanism to help select the correct printer.

Server Software

Back-end applications and web pages that facilitate a unified printing experience for students.

Toolkits

If you need to extend and customize your system, PrinterOn includes programming interfaces and source code for your Intranet site.
