

## Job Posting – Java Developers (2 positions: Sr/Jr)

### About PrinterOn:

PrinterOn is the world's leading Mobile Printing Solution within the public, enterprise and home markets. Established over twelve years ago, PrinterOn was the first to develop a cloud printing solution. PrinterOn uses Cloud technology to enable users to print documents from any smartphone, laptop or tablet to any PrinterOn-enabled printer in the world. There are over 9000 PrinterOn printing locations worldwide. The PrinterOn solution has been deployed in hotels, universities, airports, libraries and corporations in over 50 countries. Since its inception in 2000, PrinterOn has processed over 4 million print jobs and has printed more than 20 million pages.

### Position Summary:

The successful candidates will be critical members of a small collaborative development team and be responsible for analysis, design, development, maintenance and testing of software applications for the PrinterOn group of products and services.
