

PrinterOn Enterprise for Education

Secure mobile printing from any device, to any printer, on any network

Student printing should be easy, convenient and accessible, on or off campus.

For students, technology is a part of life. Smartphones, tablets and laptops proliferate campuses all over the world. Printing from these devices in the past has been difficult or not possible at all. Campus IT policies add another level of difficulty as they don't allow personal devices to connect to the secure network. PrinterOn Enterprise for Education provides a way for students to print from any device without having to connect to the network or download drivers.

PrinterOn Enterprise Benefits

Print management – integration with most print management solutions such as Equitrac, Pharos and ITC Systems

User authentication – LDAP, Active Directory integration and Access Control List creation

On-premise – installation on campus servers for data security, all encryption done on site

Secure – multiple layers of security at all stages of document processing, release codes to keep documents private

Scalable – solution meets the changing requirements of your growing campus

Print from any mobile device – all smartphones supported

GPS search – locate the printers nearest to you using mobile printing apps

Printer support – works with most printers and MFPs so you can leverage your current equipment

The Power of Mobile Printing for Education

PrinterOn Enterprise enables students and faculty to easily and securely print documents from laptops, tablets or smartphones to designated printers on campus, in the library, at residences or in labs, without having to connect to the network or download printer drivers. Students can print by uploading documents to an intranet web portal, or by emailing documents to a printer's unique email address from any Wi-Fi or Internet connected device.

Security and the Cloud

PrinterOn Enterprise is an On-Premise Cloud Solution which is deployed directly on-site. Software components are installed on campus servers and all processing and encryption of documents is done in the "Private Cloud." This ensures data stays within the boundaries of your network, providing secure mobile printing for any campus.

Authentication and Print Management

PrinterOn Enterprise has been designed for integration into your existing user directory services such as LDAP, Net Directory and Active Directory so that you can control who has access to specific printers and features.

PrinterOn Enterprise can be configured off-the-shelf for several popular system integration models, or customized as needed using the available HTML/Java source

A Printing Method to Suit Every Student

PrinterOn Enterprise is a flexible solution which offers several printing methods depending on your device, location and preference.

WEB – Students can upload documents for printing to an intranet web printing portal.

EMAIL – Simply forward an email with attachment to the printer.

DRIVER – Print from any Windows application with the PrintWhere Driver using the standard File>Print method.

APPS – Mobile printing apps are available for BlackBerry, iOS and Android devices.

code. Deployment flexibility allows PrinterOn Enterprise to be hosted in multiple local or remote network scenarios.

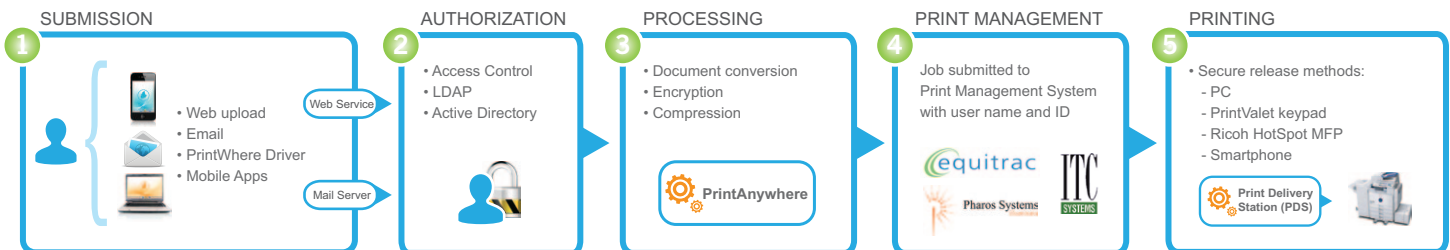

Optional integration with existing print management systems such as Equitrac, Pharos and ITC Systems, ensure proper operation with any cost recovery solutions that may use accounts, card systems or coin boxes.

PrinterOn Enterprise works with most printers and MFPs so your current fleet can be leveraged without a large capital expenditure.

Document Privacy – The Secure Release Code

PrinterOn Enterprise can be configured to use a secure release code system to keep all documents private. After a document is sent for printing, a release code is emailed back to the user which they use to release their documents. Documents not released are never printed, helping to eliminate paper waste.
