User authentication – LDAP, Active

Directory integration and Access Control List creation

On-premise – installation on corporate

servers for data security, all encryption done on site

Secure – multiple layers of security at all

stages of document processing, release codes to keep documents private

Your workforce is mobile...shouldn't your printing solution be as well?

With the massive adoption of smartphones and tablets and a major shift towards mobile printing, the need for the enterprise to provide employees on-the-go printing, wherever they may be is becoming necessary. Mobile printing allows employees to be more productive whether they are on the road, at home or in the office. No more connecting to the network, downloading drivers or needing the help of IT just to print.

The Power of Mobile Printing for the Enterprise

The PrinterOn Enterprise Mobile Printing Solution makes it possible for employees and visitors to print to your fleet of printers without having to connect to the secure corporate network. Printing can be done from any smartphone, tablet, laptop or PC simply by emailing documents to a PrinterOn Enterprise-enabled printer, or by using one of the mobile printing apps available for BlackBerry, iOS and Android devices.

PrinterOn Enterprise works with most printers and MFPs so your current fleet can be leveraged without a large capital expenditure.

Multiple networks are no problem, the PrinterOn Enterprise Print Delivery Hub (PDH) connects printers across all of your corporate networks allowing users at regional and worldwide offices to print to all locations.

The PrinterOn Cloud-based Global Directory makes it possible for employees to locate the nearest printer to them at any location using the geo-based or keyword search features within the mobile printing apps.

Security and the Cloud

PrinterOn Enterprise is an On-Premise Cloud Solution which is deployed directly on-site. An On-Premise solution satisfies the two main requirements for the enterprise customer – the ability to offer a mobile printing solution to employees while still requiring data to stay secure on site. Software components are installed on

PrinterOn Enterprise

A Printing Method for the Way Your Employees Work

PrinterOn Enterprise is a flexible solution which offers several printing methods depending on your device, location and preference.

EMAIL – Simply forward an email with attachment to the printer.

APPS – Mobile printing apps are available for BlackBerry, iOS and Android devices.

DRIVER – Print from any Windows application with the PrintWhere Driver

enterprise servers and all processing and encryption of documents is done on site in the “Private Cloud” so data stays within the boundaries of your network, providing secure mobile printing for the enterprise.

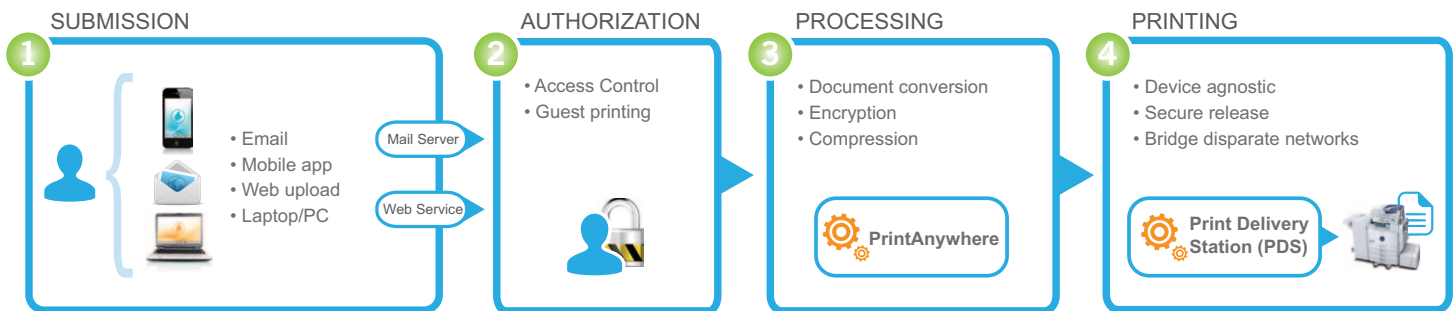

Document Privacy – The Secure Release Code

Keeping documents private within the Enterprise can be difficult. PrinterOn Enterprise uses a secure release code system to keep all documents private. After a document is sent for printing, a release code is emailed back to the user which they use to release their documents. Documents not released are never printed, helping to eliminate paper waste.

The Most Complete Enterprise Mobile Printing Solution

PrinterOn Enterprise is the most complete enterprise mobile printing system available today. PrinterOn simplifies mobile printing by providing the same familiar user interface across all Enterprise, Home and Public locations. This consistent user experience makes mobile professionals more productive, whether they are in the office, traveling or working from home.

The Ideal Architecture
