

Job Posting - Quality Assurance Specialist

About PrinterOn:

PrinterOn is the world's leading Mobile Printing Solution within the public, enterprise and home markets. Established over twelve years ago, PrinterOn was the first to develop a cloud printing solution. PrinterOn uses Cloud technology to enable users to print documents from any smartphone, laptop or tablet to any PrinterOn-enabled printer in the world. There are over 9000 PrinterOn printing locations worldwide. The PrinterOn solution has been deployed in hotels, universities, airports, libraries and corporations in over 50 countries. Since its inception in 2000, PrinterOn has processed over 4 million print jobs and has printed more than 20 million pages.

Position Summary:

As a member of the Quality Assurance team you will be responsible to ensure new and existing products and services within the development cycle are reliable, easy to use, and functioning as documented.

Responsibilities Include:

- Creating and executing test cases and test plans for PrinterOn products and services
- Detailed investigation, replication and documentation of technical issues encountered in testing or reported by Customers
- Work with minimum supervision and work independently to accomplish assigned projects

Skills and Qualifications:

- Degree or Diploma in electronic and/or computer science/technology
- Experience with QA and the ability to apply logic to develop efficient methods of testing new products
- A good understanding of software and web applications and exposure to programming skills
- Good organizational, documentation and time management skills
- High adaptability to change
- Fluent in English (oral and written), other languages are an advantage
