

PrinterOn Enterprise makes printing easy for mobile employees and provides a simple guest printing solution for visitors

"PrinterOn Enterprise was the only secure mobile printing solution that met all of our requirements including security, architecture and cost"

Benefits & Results

- ✓ Document submission from tablets, smartphones, laptops/PCs
- ✓ Secure native iOS printing
- ✓ Android Share printing
- ✓ PrinterOn mobile apps
- ✓ Authentication via LDAP/AD integration
- ✓ Guest printing to designated printers
- ✓ Corporate security policy compliance
- ✓ Less time printing means more time for company needs

Background

Based in the United States, this company provides professional and residential turf maintenance equipment and irrigation systems.

Challenge

The company needed a way to make mobile printing easier and more convenient for their mobile iOS and Android users specifically the ability to print email attachments, stored documents, web pages and documents in cloud storage via native iOS printing as well as the Android Share menu. The second challenge was to be able to offer a guest printing solution for visitors who need to print from their devices while at the company for meetings. The guest printers need to be a subset of all corporate printers with limited output options. Both of these challenges needed to be solved while still complying with the company's security requirements.

Solution

These needs were easily met with the installation of the PrinterOn® **Enterprise printing** solution which includes user submission and printing via PrinterOn's iOS and **Android printing apps** as well

as native iOS printing to the PrinterOn Enterprise Server. User authentication is also delivered through integration to LDAP/AD.

PrinterOn also provided guest printing services which enable non-personnel to submit print jobs from any location or any network to which they are connected. This was accomplished by adding PrinterOn's Centralized Print Services, a component of PrinterOn Enterprise, to the DMZ of the company's network.

PrinterOn worked with them every step of the way from concept through deployment to help realize the benefits they were looking for. The company now has a mobile print solution that meets all their needs and personnel can spend more time helping their own customers and less time on tasks related to printing.
