

## Benefits to IT Departments

- > Enterprise-grade security keeps client information secure
- > Eliminates driver management - drivers are managed in the cloud
- > Authentication - works with AD or LDAP user groups
- > Print management - integrates with your current PMS for job tracking and auditing

## Benefits to Legal Professionals

- > Ability to print from anywhere back to the office, or at a public printing location
- > Secure release of documents provides confidentiality
- > Contract employees and guests can access printing without connecting to the network or help from IT
- > Mobile apps for most popular platforms: iOS, Android, BlackBerry, provide simple search and print workflows
- > Variety of printing methods to suit different work styles - email, apps, web upload, driver

# PrinterOn for Legal

## Secure, enterprise-grade mobile printing solution for Law Firms

The legal profession relies heavily on paper documents for recording case information, so it is no surprise that printing happens frequently. Because law firms must abide by the ethical standards in place to protect the privacy of clients, a secure way of printing not only from desktops but all mobile devices is necessary to prevent documents from getting into the wrong hands. Visiting clients and contract workers also need access to secure printing without having to connect to the network.

### The PrinterOn Enterprise Platform

With the PrinterOn Enterprise Platform, law firms can add mobile print capability to the current secure infrastructure while making sure all existing solutions and services are accounted for throughout the mobile print workflow. All processing and printing of documents is done on-premise within the secure network, keeping client information private.

PrinterOn Enterprise is designed to integrate with Active Directory and other LDAP-based services, ensuring each user is authenticated before submitting documents for printing. PrinterOn works with print management solutions such as Equitrac and Ricoh Streamline NX for tracking and auditing of all print jobs, allowing law firms to allocate and bill for all client-related expenses.

To further protect client privacy, PrinterOn also adds secure release functionality via release codes or through integration with other PIN or pull printing solutions. This stops unauthorized users from accessing printed documents containing client information.

## PrinterOn Enterprise Printing Workflow

## Mobile Apps for Easy Searching and Printing

The PrinterOn mobile printing apps enable enterprise users to search for and print to all enabled corporate printers as well as all PrinterOn public printing locations while on-the-go. The apps in conjunction with the PrinterOn platform make finding a printer easy through various discovery methods, so no matter where a user is, they can find the printer nearest to them at any time.

**Enterprise Search**  
Presents all authorized printers for a specific user within an organization

**QR Codes**  
Scan QR code on printer to get printer details and save to your favorites

**Print Preview**  
View documents before printing, choose number of copies and pages

**Remote Release**  
Releasing documents directly from the app provides a fluid workflow
