

PrinterOn for AirWatch

Secure mobile printing platform for users of AirWatch

PrinterOn and AirWatch ensure your mobile users can print securely with PrinterOn while keeping apps, data and devices secured by AirWatch.

Benefits to IT

- Enterprise-grade security keeps information secure
- Centralized management means printers and drivers are managed in the cloud
- Scalable solution designed to allow for growth as usage increases
- LDAP/AD user authentication for all print workflows
- Integrates with your current print management system for job tracking and auditing

Benefits to Users

- Print from anywhere back to the office from any device as well as laptops/PCs
- Same printing experience whether in the office or at a public printing location
- Variety of printing methods to suit different work styles - email, apps, web upload, driver
- Mobile apps for popular platforms: iOS, Android, BlackBerry, provide simple search and print workflows

Enterprise-grade Mobile Printing Platform

Since 2001, PrinterOn® has been delivering secure mobile printing solutions. We understand the challenges faced by enterprises worldwide such as security, authentication, print management, disparate networks and BYOD. The PrinterOn Enterprise Mobile Printing Platform has been designed to meet the diverse printing requirements of any organization and ensures documents are printed and managed within your network regardless of device, printer, network or geographic location.

PrinterOn and AirWatch - Delivering Secure End-to-End Mobile Printing

As an AirWatch® customer, enjoy the same great capabilities of PrinterOn Enterprise with the added app security and management capabilities provided by the AirWatch platform. The PrinterOn mobile app is compatible with AirWatch AppShield and was built leveraging the AirWatch Software Development Kit.

PrinterOn provides the enterprise with control over print workflows and security from beginning to end, much like AirWatch does with mobile devices and the applications on them. PrinterOn and AirWatch work as logical extensions of each other with AirWatch managing devices on the network and PrinterOn layering secure print workflows on top, connecting networks and enabling mobile users to print securely.

NEW! Native iOS Printing Support

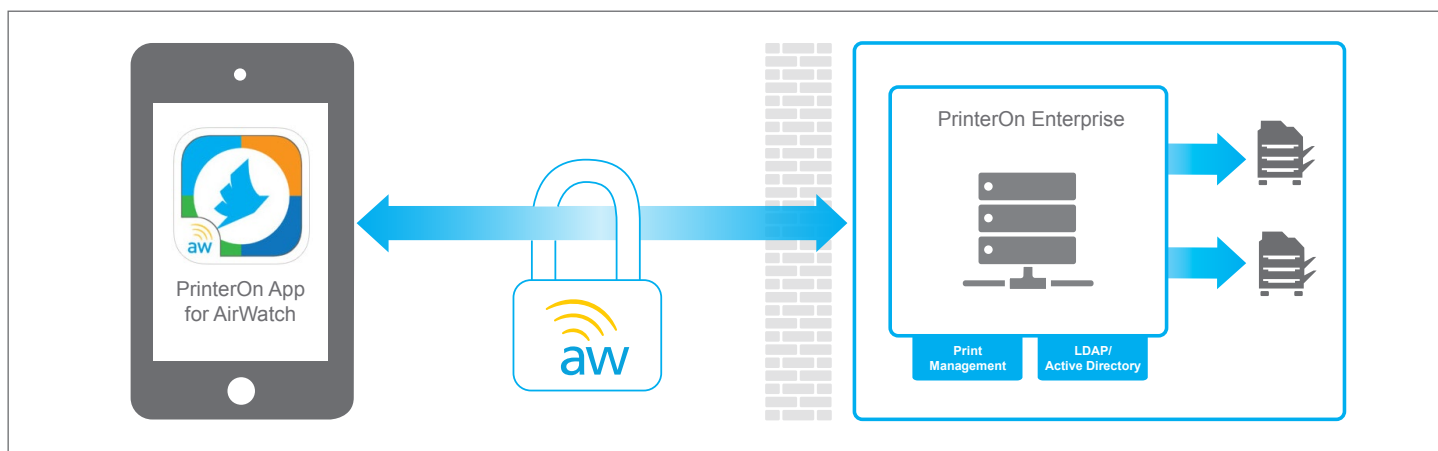

Many organizations find that it is difficult to offer users a native iOS printing experience because of the fundamental limitations of how iOS printing works in combination with their network architecture. With PrinterOn Native iOS Printing support for AirWatch, enterprise administrators can not only turn any printer into a native iOS-capable printer, they can

finely control which printers users can access through AirWatch configuration push. With PrinterOn Native iOS Printing for AirWatch, users get the native iOS printing experience they are looking for and administrators get the control they need.

- Enable native iOS printing functionality to any printer—even printers on other networks
- iOS users simply use the native iOS print button
- No separate mobile app required
- Zero user config—deploy PrinterOn native iOS printing configurations via AirWatch
- All the features, security, and scalability of PrinterOn tied into the iOS print button
- Print from iPhones or iPads to any PrinterOn printer regardless of network or location

The PrinterOn Integration with AirWatch

The PrinterOn for AirWatch Mobile Printing App

The PrinterOn for AirWatch App is designed for the Enterprise or SMB that wants to use PrinterOn solutions alongside their AirWatch Device and Application Management features. The PrinterOn for AirWatch app lets users search for and print to all PrinterOn Enterprise enabled printers in your organization. Users of the app can also access PrinterOn public print locations such as hotels, airport lounges and libraries.

- Certified for use with AirWatch
- Automatically discover available PrinterOn Enterprise printers and associated services regardless of network or location
- Find the nearest print location using GPS, search by keyword, or scan printer QR code
- Print Microsoft Word, Excel, PowerPoint and PDF files as well as photos and web pages
- Print from the AirWatch Secure Content Locker
- LDAP/AD user authentication
- Release codes for secure document release
- Access over 10,000 public print locations worldwide
