+ Drive Brand Loyalty

Keep a competitive edge by offering the latest technology at airport lounges. Frequent business travelers are looking for basic office amenities such as workstations and printing to keep them productive and will book with the brands that provide these important services.

+ Lower Operating Costs

No need for dedicated staff and high cost equipment. With a PrinterOn embedded printer all you need is someone to supply paper and toner and a connection to the internet. The small footprint of many models enables you to place a printer almost anywhere.

+ Simplify Administration

The print service is easily managed through a single location. The PrinterOn web console provides access to all settings, printers, configurations and reports making managing and monitoring simple and efficient.

+ Increase Security

Eliminate the use of USB sticks which can be a potential security risk. With PrinterOn, no guest data ever touches your network or servers preventing unwanted viruses that can harm the entire infrastructure.

+ Be More Green

20% of all print is waste. PrinterOn prevents documents from automatically printing through a secure release code system. Forgotten documents won't be left on the printer and end up in the recycling bin which saves paper and consumables.

+ Improve User Experience

While at the airport on a phone, tablet or laptop, PrinterOn enables travelers to print from any device or location to a convenient printer in the airport lounge keeping them productive while traveling for business.

airport lounges

PrinterOn can provide mobile print for business travelers who like to remain productive while waiting for their flight.

"How can I provide lounge guests with a way to print from their devices without staff interaction?"

PrinterOn is a self-serve printing solution that will free your staff from handling print requests from lounge guests and let them focus on more relevant tasks.

"I am at the airport and need to print. How can I find a printer?"

PrinterOn is available at many major airline lounges. Download the PrinterOn app (iOS/Android) and do a keyword search or have nearby printers displayed to you through the GPS functionality of your device.

"I only have a minimal amount of space for a printer in the lounge."

PrinterOn embedded printing solutions are a cost effective way of providing travelers with access to printing from any device. The small footprint of many models enables location almost anywhere.

- **Mobile Device and Printer Agnostic**

Support for all printer manufacturers and mobile device types is especially beneficial in a "BYOD" environment.

- **Mobile Apps and Print Plugins**

PrinterOn mobile apps for iOS and Android are unsurpassed in their ability to allow users to find and securely print to private or public printers. The Android print plugin provides native printing without using a 3rd party app for a more natural workflow.

- **Remote Printing**

PrinterOn securely connects print requests submitted from a device on one network to physical printers on a completely disconnected network, even from desktop computers and home printers.

- **PrintWhere®: Windows Print System**

A complete secure print rendering and submission system for Windows-based devices including desktops, laptops, and Surface tablets.

- **Pull Printing**

Secure Release Anywhere™ gives users the flexibility to choose an output device at the time of print release which reduces print waste when combined with secure release.

- **Plug-and-play Solutions**

PrinterOn has partnered with industry-leading printer manufacturers to provide all-in-one mobile print solutions for any location. Many models are available to suit your specific requirements.
