

USB PrintValet Keypad

Secure print release
for PrinterOn Mobile
Printing Solutions

- Easily add secure release to your PrinterOn service
- Uses standard USB connection
- For use with a PC or PrinterOn PrintConnect device
- Operates in 6 languages: English, French, Spanish, Italian, German, Dutch

Add Secure Release to Your PrinterOn Service

The PrintValet™ keypad provides users of the PrinterOn Mobile Printing Solution the ability to release their documents securely from a printer using PrinterOn release codes.

How Does it Work?

The PrintValet connects to the PrintConnect™ or a PC (depending on deployment) using a USB port. After the user submits a print job, they are emailed a secure release code. This release code is then entered on the PrintValet keypad to securely release their documents.

The PrintValet is ideal for the following situations:

- When the PrintConnect network device is used for deployment of the PrinterOn solution
- The PC with the PrinterOn mobile printing software is secured and users do not have access or permission to use it for print release
- When a PC with the PrinterOn mobile printing software is in a heavily used, busy location, the PrintValet allows immediate print release without waiting for the computer

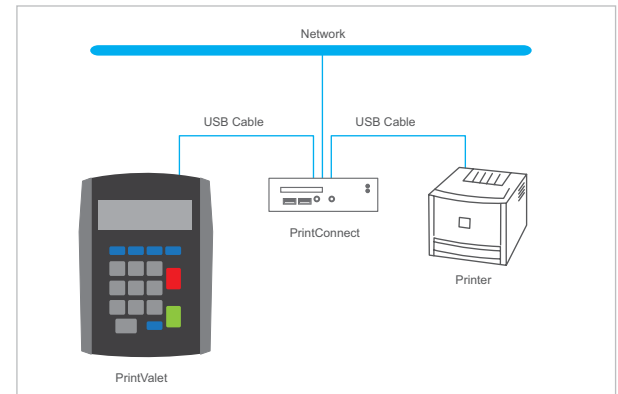

Technical Specifications

Standards	
Interface	• USB 1.1 - 2.0
Display Command Set	• ASCII standard
Keys	• 17 keys
Display	
LCD	• 16x2, 5x8 DOTS (display, character)
