

PrinterOn Print Delivery Station and PrintConnect Upgrade Notice

Version: PDS 2.6DT, PrintConnect 1.1AP

Product Changes and Enhancements

The PrinterOn Print Delivery Station allows users to turn nearly any printer into a Cloud Capable printer. The PrinterOn Print Delivery Station software and PrinterOn PrintConnect Cloud Print Appliance connect your printers or MFPs to PrinterOn's services both hosted by PrinterOn or the PrinterOn Enterprise Private Cloud solution.

The PrinterOn PDS software is a software-based cloud print enabling solution, whereas the PrintConnect is a dedicated hardware Cloud Print appliance. Together, these solutions provide a wide range of options and flexibility to meet various deployment needs. Both solutions provide simple and easy installation and configuration capabilities to enable printers and MFPs in minutes.

This upgrade has introduced a number of improvements including:

- **New – Brazilian Portuguese Support**
The Print Delivery Station Release Client platform now supports Brazilian Portuguese in addition to the existing set of supported languages: English, French, German, Dutch, Spanish, Italian and Japanese. Please note that Brazilian Portuguese is not supported on the PrintValet keypad due to hardware restrictions.
- **New – Network PrintValet (Print Delivery Station Only)**
Introduced support for a new Network-based PrintValet keypad. The new Network PrintValet provides a new option to enable secure release on printers with minimal overhead. The Network PrintValet may be installed next to a printer and connects via a standard Ethernet network connection to PDS. The PrintValet provides a convenient pass-through network switch allowing printers to be enabled with no additional hardware or network configurations.
- **Fixed – Flickering Character PrintValet Display**
Fixed an issue that could occur with some PrintValet keypads that caused characters to flicker when entering Release Codes. The issue is limited to a small number of PrintValets.

Please contact support@printeron.com if you have any questions.
