

PrinterOn Mobile for Android Release Notes

Version 3.1.0

Product Changes and Enhancements

PrinterOn Mobile for Android offers an integrated solution for accessing both the PrinterOn Enterprise Platform as well as the PrinterOn global network of public print locations in a single unified application. PrinterOn Mobile for Android simplifies the process of discovering and printing to all PrinterOn services.

The following are some of the enhancements and improvements that have been made in this version of PrinterOn Mobile for Android.

- **New – Local Documents Browser**

This release of PrinterOn Mobile for Android introduces a new local files and documents browser within the application. Users may now browse their local storage for documents without leaving the PrinterOn App.

- **New – Enhanced Print Options**

PrinterOn Mobile for Android now supports extended print options including:

- Duplex control
- Paper size selection
- Color or mono selection
- Collate control

These are in addition to PrinterOn's existing page range and copies options, providing complete control over the print experience.

Print options are integrated with printer capabilities and administrator tools allowing users to select only from supported paper sizes or manage duplex based on administrator rules.

- **New – Good MDM Support**

PrinterOn's Android application now supports Good Dynamics MDM integration providing additional security and integration with the Good Dynamics platform for customers. The PrinterOn Android app with Good Dynamics support can be found in the Google Play store.

- **New – URL "Share" Support**

URLs from applications including Android versions of Chrome and Firefox may now be shared with the PrinterOn Mobile App. URLs will be loaded within the PrinterOn Mobile App to be printed.

- **Improved – Job Name Consistency**

Improved job name information delivered to the print server for content including web pages and images. URLs now provide the hostname of the URL or the original image name shared from other applications.

Please contact support@printeron.com if you have any questions.
