

PrinterOn Embedded Agent for Samsung MFPs/Printers Release Notes

PrinterOn Embedded Agents

PrinterOn Embedded Agents for Samsung printers are embedded software applications that enable simple plug and play printing for PrinterOn's Hosted or On Premise solutions. They are a new addition to the PrinterOn Print Delivery ecosystem eliminating the requirement for customers to install any additional hardware or software component to be able to release the print jobs submitted to the PrinterOn Service. They come preinstalled on a number of Samsung GV device models allowing users to print seamlessly using any of the PrinterOn supported document submission methods. The list of supported GV models can be found here:

Product Features

- **New – Simple Plug-n-Play Printing**

PrinterOn Customers/Resellers can now connect their Samsung printers/MFPs to the PrinterOn Service with a single key press on the printer panel. This process will

- Allow PrinterOn service to configure the printer listing using the printer capabilities information retrieved from the printer/MFP (e.g., Printer Driver, Color, Duplex, Paper Sizes etc...)

Following service activation, PrinterOn Customers/Resellers can easily register the PrinterOn Service for their Samsung printers/MFPs online. Registering the PrinterOn Service will:

- Enable secure printing using any of PrinterOn supported document submission workflows (e.g., Web, Mobile Apps, and Email).
- Allow you to release documents directly through the user interface of Samsung embedded printer solutions
- Allow you to manage and customize your PrinterOn printing portal

Once registered, your Samsung printer/MFP will be ready for printing and administration.

- **New – Remote Release**

Supports remote release capability allowing print users to release jobs from PrinterOn Mobile Application and Web interface in a secure fashion.

- **New – PrinterOn Look and Feel**

The application makes use of standard PrinterOn Icons and Logos giving it a familiar look. The Application UI interface has been tailored to suit PrinterOn's Service Integration requirements.

Please contact support@printeron.com if you have any questions.
