

PrinterOn Cloud Print Services Release Notes

PrinterOn Cloud Print Services 6035-5041

The PrinterOn Cloud Print Services provide a wide range of services to customers and partners. Services include PrinterOn Hosted Cloud Print that offers print services for mobile apps, email and through PrinterOn's customizable Web Print Portal. The PrinterOn Web Services also offer PrinterOn's web-based service administration portals and PrinterOn's APIs.

Product Changes and Enhancements

- **Improved – Printer and Site Administrator Management**
Improvements have been made to the PrinterOn Hosted Printer and Sites Administrator capabilities including:
 - The ability to add new users to all printers in a department at the time of creating new users.
 - Overall performance improvements adding and removing administrators to printers and PrinterOn Sites.
 - The ability for printer administrators to modify the destination IP address to be used by the PrinterOn Print Delivery Station.
 - Removed superfluous colon ":" characters added to printer IPs when no port is specified.
- **Improved – Registration for Brother Cloud BSI Printers**
Multiple issues resolved for Brother Cloud BSI printers including addressing an issue that caused trials to have an incorrect duration
- **Improved – Registration for Samsung Embedded Printer Agents**
Multiple performance and reliability improvements for the automated Samsung printer registration process have been made.
- **New – Print Portal Printers Sorted Alphabetical**
Printers displayed in the Printer Hosted Print portal are sorted alphabetically using the Printer Label message.
- **Fixed – PayPal Print Support**
Resolved an issue that caused some transactions to be cancelled in process. A change in PayPal DNS names caused issues communicating between servers.
- **New – Bear Solutions Support**
Added support for Bear Solutions print accounting software.
- **Fixed – Missing Print Driver Switching On-Premise to Hybrid Deployment Mode**
Addressed an issue that incorrectly set a print driver when switching PrinterOn Enterprise or PrinterOn Express from On-Premise to Hybrid mode. Drivers are now properly matched and selected after switching.

Please contact support@printeron.com if you have any questions.
