

PrinterOn PrintWhere 5.2.1 Release Notes

Version 5.2.1

Product Changes and Enhancements

PrinterOn's PrintWhere® Universal Driver is a unique and powerful software solution that enables any Windows based PC or laptop to print to any PrinterOn enabled Hosted, Express or Enterprise print device. PrintWhere eliminates tedious printer configuration and empowers users to discover and print to printers anywhere in the world using a simple and easy to use software solution.

This release of PrinterOn's PrintWhere Universal Driver is a maintenance update to address a few issues reported in the PrinterOn PrintWhere 5.2.0 release.

The following are some of the enhancements and improvements that have been made in this version of the PrinterOn PrintWhere Universal Driver.

Platform Support:

- **New – User Account Validation Check**
A new option has been added to the allow users to quickly validate their account with the PrinterOn Hosted or PrinterOn Enterprise|Express server before saving their settings.
- **Fixed – PrinterOn PrintSpots Driver Support**
Resolved an issue that could cause PrintWhere to stop working after printing using the PrinterOn PrintSpots® Driver.
- **Fixed – Orientation Support For Excel and PowerPoint Documents**
Addressed an issue that caused some Microsoft Excel and PowerPoint documents to ignore requests to print in landscape. This issue was mainly observed with Microsoft Office 2010.
- **Fixed – International Characters in Search Results**
Addressed an issue that caused non-English characters to appear as question marks (???) in the Printer Chooser when searching for new printers.
- **Fixed – Unresponsive User Interface**
Addressed numerous issues reported which caused the PrintWhere user interface to become unresponsive or crash when accessing pages such as the About dialog.
