

**Effective July, 2011**

**PrinterOn PrintWhere 3.6BP**

---

The PrinterOn PrintWhere Universal Print Driver enables users to print from any Windows® application to PrinterOn print locations anywhere in the world.

This release of PrintWhere focused on networking performance and reliability and PrintWhere's support for PrinterOn Job Accounting APIs.

**Changes in this release:**

- Updated PrintWhere's overall network communication layer for improved reliability and performance.
- Improved PrintWhere's handling of documents with names containing non-English characters.
- Improved PrintWhere's integration with PrinterOn's Authorization, Accounting and Auditing APIs including improved support for international characters.
- Numerous performance and reliability enhancements when using PrintWhere with the PrinterOn PrintAnywhere server including:
  - Improved PrintWhere's performance when switching between multiple printers in server mode.
  - Improved PrintWhere's performance responding to print jobs which cannot be successfully processed.
- Addressed an issue when configuring PrintWhere to communicate directly with local network Print Delivery Station installation where PrintWhere may remember previous network configurations.
- Addressed an issue which may produce black and white output to some PCL printers.
- Addressed an issue which may leave the cover page "From" field blank.

**Supported Operating Systems:**

- 32-bit versions Windows XP and later.
- 64-bit versions Windows Vista and later.
