

PrinterOn Web Services November 2012 (5014) Upgrade Notice

Product Changes and Enhancements

The PrinterOn Web Services offering is a central element in the PrinterOn Cloud Print platform. The PrinterOn Web Services offer PrinterOn customizable Cloud Printing Portals, PrinterOn web-based administration portals and PrinterOn's APIs.

PrinterOn provides to partners and integrators a wide range of APIs such as the PrinterOn's Directory API and Print API. These APIs are utilized by millions of users using applications such as those developed by Hewlett-Packard, Ricoh Corporation and PrinterOn.

In addition to new functionality and improvements, PrinterOn has undertaken a significant upgrade of our underlying web services architecture. The upgrade will provide significant performance improvements performance reliability and lays the foundation for further exciting improvements from PrinterOn.

- **NEW – Administration Interface**

The PrinterOn Cloud Print administration interface has been updated with a new and refined look and feel. Performance improvements also provide a more efficient interface.

- **Improved – Web Page Performance**

An extensive infrastructure upgrade provides significant improvements loading and displaying Cloud Print Portal and administration pages.

- **Improved – PrinterOn API Performance**

Significant performance improvements have been made to the PrinterOn API functionality. Improvements result in significantly faster performance searching for and retrieving details for PrinterOn-enabled print locations.

- **Improved – Print Management Integration**

Improved compatibility when integrating with 3rd party print management solutions using PrinterOn's generic Postscript drivers.

- **Improved – Bulk Printer Configuration**

Numerous improvements to the recently released Bulk Printer Configuration functionality to ensure printer address information is correctly applied to other printers amongst other small improvements.

- **Improved – Google Chrome Improvements**

Improved compatibility with Google Chrome.

- Numerous other improvements to PrinterOn's Cloud Print web services
