

## Infrastructure/Network Engineer

PrinterOn is looking for a strong technical team member who is passionate about product innovation and teamwork.

PrinterOn, an HP, Inc. company, is used every day by people all over the world and we are looking for individuals who share in our excitement and passion for quality and a desire to take advantage of Cloud technology to transform the industry. Our goal is to create simple and accessible software services that modernize the print industry through Cloud technology and Enterprise grade solutions. To do this, we need to give talented, enthusiastic, and passionate people opportunities to create, develop, and collaborate.

PrinterOn creates industry-leading Cloud and On-Premise Enterprise print services as well as a range of mobile apps and services. While PrinterOn's focus is on the print industry, at our core we are a Cloud and Mobile technology company leading and challenging the industry to expand beyond the traditional solutions.

The Infrastructure/Network Engineer is a key part of the IT team. A successful Infrastructure/Network Engineer ensures continuous delivery from development to a production deployment and contributes directly to the overall architecture and design. The goal is to increase the reliability, performance and access for mobile users while still maintaining a high-level of security.

PrinterOn strongly believes in a hands on approach for all technical team members and will encourage contributions both in the development process as well as directly in technical design and direct implementation.

You are an ideal candidate if:

- You are excited about modern Cloud technology and architectures
- You are interested in automation and modern deployment methodologies
- You love to figure out how all the pieces are put together
- As you grow in this role, you continue to keep up-to-date and innovate with the latest in Cloud, mobile and software technologies
- You are passionate about high performance and put the performance of the team above you as an individual

As an Infrastructure/Network Engineer at PrinterOn, you will have an impact by:

- Deploys, configures, manages, and performs ongoing maintenance of infrastructure including all tools used by PrinterOn
- Troubleshoots and resolves technical operational issues, maximizing network performance by monitoring performance, troubleshooting network problems and outages, scheduling upgrades and collaborating with network architects on network optimization, related to the Infrastructure/Network
- The design and implementation of new solutions and improving resilience of the current environment
- Undertaking data network fault investigations in local and wide area environments, using information from multiple sources
- Securing network systems by establishing and enforcing policies, and defining and monitoring access
- The support and administration of firewall environments, upgrading corporate infrastructures, configuration of routing and switching equipment in line with IT security policy

- Cloud Management Group – hosted production site
- Migration to the cloud
- Integrate mobile devices into the workplace
- Remote support and troubleshooting if issues occur upon initial installation
- Other duties/projects as assigned

**Experience and Qualifications:**

- 5+ years of relevant work experience an asset
- Knowledge of web services and Cloud technologies
- Hands on experience with AWS, Azure and VMware
- Experience working with Linux and Windows platforms
- Experience in Active Directory and Azure AD
- Experience in MSOffice and MS Exchange
- Experience in working with various hardware infrastructures– compute, networking, storage, infrastructure security
- Experience in environments using AWS services including, S3, Route53, CloudWatch, PagerDuty, etc.
- Experience in Cloud Backup Methods and solutions
- MCSE Training and Certifications

**Education:**

- Bachelor's degree in Computer Science, Engineering or equivalent experience
