

PrinterOn Enterprise 4.0.2 - Release Notes

Version 4.0.2

Product Changes and Enhancements

PrinterOn Enterprise 4.0.2 is a small maintenance update intended to address a single use case that was identified and introduced in 4.0.1

This release supersedes the 4.0.1 release and should be used in all cases.

IMPORTANT NOTE: You can only upgrade to PrinterOn Enterprise and Express 4.0 from version 2.5.1 or higher. For upgrades from previous versions, please update your software to the latest version of 2.5.1.

PrinterOn STRONGLY recommends upgrading all servers to version 3.2.7 before upgrading to 4.0.1 for the best upgrade experience.

General Improvements and Resolved Issues

The following section describes issues that have been resolved and other general product improvements.

- **Fixed – New job notifications not delivered from the Print Delivery Hub** (SPOCPS-4899)
Addressed an issue that caused notifications from PDH to fail to be delivered to a Print Delivery Station when using PrinterOn's Secure Release Anywhere. The issue occurred when multiple Print Delivery Stations in a single pull print pool were configured with the same serial number.
- **Fixed – Jobs stop downloading after heavy load with certain Secure Release Anywhere configurations** (SPOCPS-4905)
Addressed an issue where PDS would stop downloading new pending print jobs from PDH when configured for Secure Release Anywhere. This could occur when PDS is enabled for Secure Release Anywhere and PDS is receiving print from a Print Delivery Hub. PDS would pause when more than 250 jobs were submitted and not printed during the job expiration period and secure Release Anywhere was configured for Central Storage.

NOTE: These release notes and previous versions may be found on the PrinterOn on website at <http://www.printeron.com/support/product-releases.html>
