

PrinterOn Mobile for Android 3.5.8 - Release Notes

Version 3.5.8

PrinterOn Mobile for Android offers an integrated solution for accessing both the PrinterOn Server Platform as well as PrinterOn's global network of Public Print locations in a single unified application. PrinterOn Mobile for Android simplifies the process of discovering and printing to all PrinterOn's services.

PrinterOn Mobile for Android supports Android 4.4 or newer.

Product Changes and Enhancements:

- **New – Citrix MDM Support** (AND-1151)
PrinterOn Mobile for Android now supports the Citrix MDM platform.
- **New – Multiple PrinterOn Services in an MDM configuration** (AND-1016)
To support complex network deployments, services have the option of deploying multiple PrinterOn services to be configured at once within the same MDM.
- **Improved – Print History Storage Management** (AND-1139)
Android users now have the option to set the Print History Storage size to 0MB.
- **Fixed – Updated User Messaging Consistency** (AND-1111)
Updated messaging in Android to provide more consistent messaging as compared to the iOS version.

System Requirements

- Android 4.4 or newer
- MDM/MAM integrated applications require a configured MDM/MAM server and provisioned device to work correctly.

Please contact support@printeron.com if you have any questions.
