PrinterOn PrintWhere 6.1.4 Supplemental - Release Notes

Version 6.1.4

PrintWhere enables any Windows-based PC, laptop or Surface tablet to print to any PrinterOn-enabled print device. PrintWhere is ideal for the following situations:

- Frequent printing
- Printing to different networks
- Printing to remote printers
- Printing of gated content

PrinterOn PrintWhere supports Windows 10 or newer.

NOTE: This release is a supplemental update to PrintWhere intended only to address specific reported issues and does not contain new functionality. This update supersedes previous releases. This release may require an uninstallation of any existing PrinterOn Enterprise 4.1.4 version to upgrade correctly.

Product Changes and Enhancements:

- **Improved – Support for Third-Party iDMs** (PWC-7062)
  PrintWhere has been upgraded to support a wider range of third-party iDM and SSO platforms, including Skuario and others.

- **Fixed – Improved Print Delivery to PDS** (CSS-1275)
  In some specific configurations, PDS was mistakenly rejecting PrintWhere jobs as duplicates. This supplemental release resolves the issue.

System Requirements

- Windows 10 or newer
