

PrinterOn PrintWhere 6.2.0 - Release Notes

Version 6.2.0

Product Changes and Enhancements

PrinterOn PrintWhere is a unique and powerful software solution that enables any Windows-based PC or laptop to print to any PrinterOn-enabled print device. PrintWhere eliminates tedious printer configuration and empowers users to discover and print to printers anywhere in the world using a simple and easy-to-use software solution.

This release supersedes the 6.1.4 release and should be used in all cases.

New Features and Enhancements:

- **New – Automated PrintWhere Plugin Installation** (PWC-7050)
PrintWhere Desktop administrators can now include the download and installation of printer plugins as part of the automated provisioning process for PrintWhere.

PrintWhere deployment scripting has been updated to include the ability to download and install printer plugins using Windows Group Policy or Windows Intune. This enables administrators to provision and configure PrintWhere for users without required Windows' permissions.
- **Improved – Improved Installation Compatibility with Windows 10** (PWC-6979)
Addressed issues identified with certain Windows 10 variants, including Windows 10 IoT Enterprise Edition, that caused PrintWhere to fail the installation process.
- **Improved – PrintWhere Support for Thin Client Environments** (CSS-979)
PrintWhere now supports improved support for Windows 10 IoT Enterprise 2016 LTSC as part of an effort to provide improved thin client compatibility.
- **Fixed – PrintWhere Fails to Install when Windows Firewall Disabled** (CSS-1188)
Addressed an issue that caused PrintWhere to fail to install if the Windows' firewall service has been disabled or stopped. This only affected situations where the Windows' service had been disabled or stopped.
- **Fixed – PrintWhere Resetting to Default Printer** (CSS-1223)
Addressed an issue that caused PrintWhere 6.1.3/6.1.4 versions to automatically reset themselves as the default Windows' printer after a system reboot.
- **Fixed – Crashing when using PrintSpots Universal** (PWC-7060)
Addressed an issue that caused a crash when using PrintWhere on Windows 10 Pro when configured to use PrinterOn PrintSpots Universal driver. The issue was only reproducible with some Windows 10 Pro updates including v1709 and v1803.

NOTE: These release notes and previous versions may be found on the PrinterOn on website at <http://www.printeron.com/support/product-releases.html>
