

Print Delivery Station 4.1.4 - Release Notes

Version 4.1.4

Product Changes and Enhancements

The PrinterOn Print Delivery Station allows users to turn nearly any printer into a Cloud Capable printer. The PrinterOn Print Delivery Station software connects your printers or MFPs to PrinterOn's services, including PrinterOn Hosted and the PrinterOn Enterprise Server.

The PrinterOn Print Delivery Station software is a software-based cloud print enabling solution that provides a wide range of options and flexibility to meet various deployment needs. The solution's easy installation and configuration capabilities allow you to enable printers and MFPs in minutes.

This release supersedes the 4.1.3 release and should be used in all cases.

IMPORTANT NOTE: You can only upgrade to PrinterOn Enterprise 4.0 from version 2.5.1 or higher. For upgrades from previous versions, please update your software to the latest version of 2.5.1.

PrinterOn STRONGLY recommends upgrading all servers to version 3.2.7 before upgrading to 4.0.1 for the best upgrade experience.

New Features and Enhancements:

- **Improved – Enterprise Server Compatibility**
This update contains updates to ensure compatibility with the PrinterOn Enterprise Server 4.1.4 when synchronizing printers.
- **Fixed – Web Release Interface Presentation** (PDS-1540)
Removed some unneeded messages from the web release interface to improve the presentation and usability of the interface.

NOTE: These release notes and previous versions may be found on the PrinterOn on website at <http://www.printeron.com/support/product-releases.html>
