

PrinterOn Mobile for iOS 3.6.3 - Release Notes

Version 3.6.3

PrinterOn Mobile for iOS offers an integrated solution for accessing both the PrinterOn Server Platform as well as PrinterOn's global network of Public Print locations in a single unified application. PrinterOn Mobile for iOS simplifies the process of discovering and printing to all PrinterOn's services.

NOTE: This release has an important security update, please see details below for more information.

PrinterOn Mobile for iOS supports iOS 9.0 or newer.

Product Changes and Enhancements:

- **New – New redirect URL when using PrinterOn Mobile Apps with Microsoft Azure AD** (CSOAND-1828)
With the release of PrinterOn Enterprise 4.2.3, if you are using Microsoft Azure AD or Google Identity Platform as your IDM and users will be using the PrinterOn Mobile App for iOS, you'll need to add an additional redirect URL when registering your PrinterOn service as a trusted app in Azure AD. When registering your PrinterOn app, you'll now need to specify the following redirect URL:
ponauth://oauthredirect/
See the PrinterOn Enterprise documentation for more details on providing redirect URLs during the Azure AD registration process.
- **Improved – Third-party IDM authentication workflow for PrinterOn Mobile Apps** (CSOPWC-6973)
This release provides an improved workflow when using Azure AD or other third-party IDMs with the PrinterOn Mobile for iOS app as the print client. Previously, the PrinterOn Mobile for iOS app opened an authentication request in an external browser window, which caused the PrinterOn app to lose focus. To avoid this issue, this release of PrinterOn Mobile for iOS launches an embedded browser to collect user credentials. With this solution, the PrinterOn app still has no visibility into the credentials collected, but is better able to control the workflow and ensure that once the user is authenticated, the app focus returns to the app.
- **Updated – Microsoft Intune MDM/MAM SDK** (CSOIOS-666)
Updated the Intune MDM/SDK to version 10.0.7.

System Requirements

- iOS 9.0 or newer
- MDM/MAM integrated applications require a configured MDM/MAM server and provisioned device to work correctly.

Please contact support@printeron.com if you have any questions.
