

PrinterOn Mobile for iOS 3.6.6 - Release Notes

Version 3.6.6

PrinterOn Mobile for iOS offers an integrated solution for accessing both the PrinterOn Server Platform as well as PrinterOn's global network of Public Print locations in a single unified application. PrinterOn Mobile for iOS simplifies the process of discovering and printing to all PrinterOn's services.

PrinterOn Mobile for iOS supports iOS 10.0 or newer.

Resolved Issues:

- **Fixed – Finishing Options caused the app to close in iOS 13** (CSOIOS-718)
In the previous release of the PrinterOn Mobile App for iOS, an issue was introduced which resulted in the app closing when the user opened the Print Options page to specify their finishing options. The issue only affected users running iOS 13. This issue arose due to Apple updating an input control; the app was erroneously still using an older implementation of the control. This release uses the updated control.

System Requirements

- iOS 10.0 or newer
- MDM/MAM-integrated applications require a configured MDM/MAM server and provisioned device to work correctly.

Please contact support@printeron.com if you have any questions.
