

PrinterOn and Carr Xerox provide a print solution for patrons using laptops and mobile devices

Mobile print technology helps attract a new generation of patrons and generates revenue

“After installing our new Xerox WorkCentre machines from CARR, we inquired about a mobile printing solution to allow our patrons easy access to print from their personal devices. PrinterOn was installed to work with our new copiers. Patrons and employees alike have been able to print easily from their laptops and phones.

We are very happy with the cost, service and support from PrinterOn. I would recommend PrinterOn to any public location that wants to offer easy mobile printing to their patrons or customers.”

Dan Russ
IT Specialist
Hicksville Public Library

Industry: Library

Challenge:

- People at the library working on their laptops had no easy way of printing documents
- Patrons had to bring USB sticks and download their information onto a library computer to print in the library, this was cumbersome as well as a security risk

Solution:

- PrinterOn Hosted
- 2 Xerox MFPs with Jamex coinbox
- 2 PrintValet™ keypads for secure release

Benefits:

- The solution brings more patrons into the library, specifically in the 20-40 age range
- Eliminating the need for USB sticks prevents unwanted viruses on the library network
- Pay-for-print generates revenue for the library
- New printers and printing technology keeps patrons happy and returning to the library
