

# Increase mobility and ensure print productivity for your organization

Corporate Profile

By the end of 2021, there will be over 27.1 billion devices connected to the Internet — that's more than 3 devices for every single person on the planet! [Cisco, 2021]

## PrinterOn is Secure Print, Tracking and Management - with Mobile First

PrinterOn is the premier mobile printing solution that enables users to securely print from any smartphone, tablet, laptop or desktop, to any printer, no matter the networks in between. In short, with PrinterOn you can "Print Simply Anywhere®". Every PrinterOn print job is secure. And with PrinterOn secure release, print waste is drastically reduced—unreleased print jobs never get printed. That saves paper and consumables.

Today, PrinterOn is a licensed mobile and cloud product of ePRINTit USA, LLC, the worlds largest provider of mobile and cloud print solutions. Today ePRINTit products are deployed in over 100 countries in over 165 languages and resold through the worlds largest OEM manufacturers of printers and managed print solution providers. ePRINTit has been providing hyper-secure mobile and cloud printing to enterprise, higher education, and public print locations since 1997. We believe that the future is here and cloud technologies are surpassing the old on-premise servers and print driver technology. Together, we are on a mission to help you make every cloud printing experience infinitely better. The ePRINTit solution provides its users with a global pay for print, scan, copy features directly embedded in iOS and Android Apps as well as email printing, web portal, and file-to-print drivers, servicing clients without the need for a print driver or print server management

PrinterOn is available in three editions: Enterprise and Express for on-premise deployment and Hosted for cloud. All editions feature secure printing and release and PrinterOn's robust mobile apps for iOS and Android. Also included in all editions: email printing, web app printing, web portal print, Native iOS Printing, Google Cloud Print integration, and PrintWhere® - PrinterOn's local Windows print system for any Windows-based computer or Surface tablet.

enterprise

- For large enterprises or those with complex workflow requirements
- On premise, hybrid cloud or 3rd-party cloud deployment
- Remote printing to print across disparate networks, even from desktops
- Advanced Mobile Device Management (MDM) integration
- Advanced Secure Release Anywhere™ pull printing
- Advanced reporting and analytics for print management
- Available ERP integration including SAP and Oracle

enterprise hosted

- For those organizations that need a global managed service
- Provides all the same security and services of PrinterOn Enterprise
- Perfect for SMB's that want secure multi-tenant technology but don't want to manage it
- No expensive infrastructure to pay for or manage - we do it all and you pay an annual fee based on number of printers in your fleet.

hosted

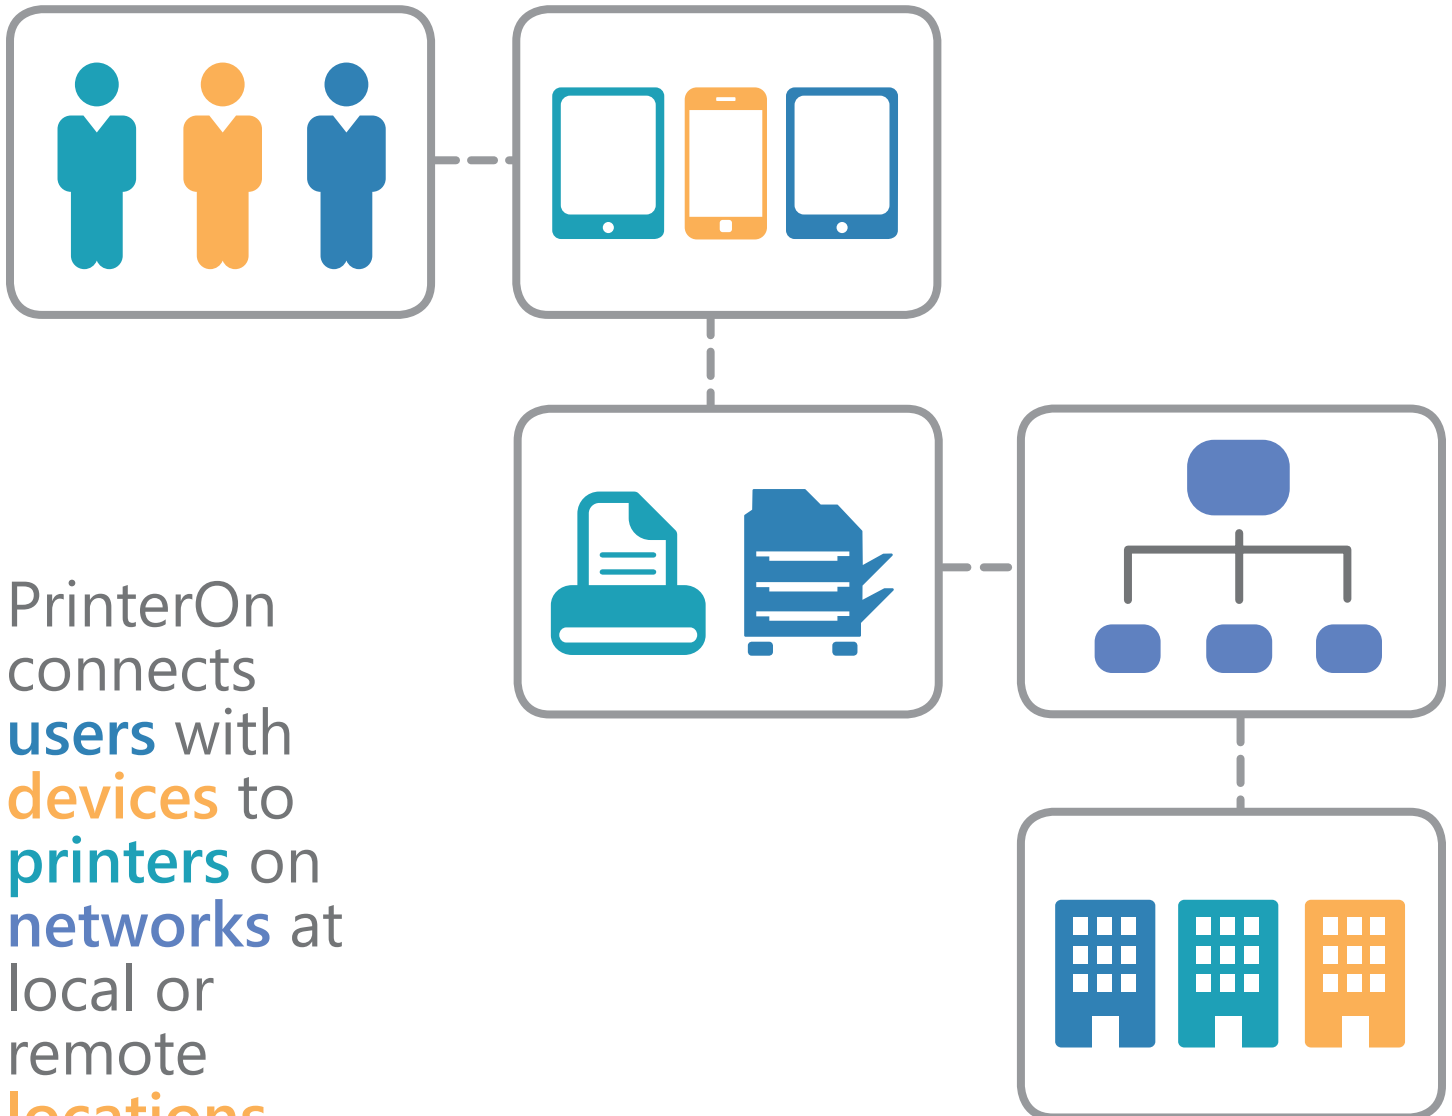

- For public printing locations such as hotels and libraries
- For organizations who prefer a cloud-based deployment
- No print drivers or print servers to manage
- Remote printing
- PayPal integration

# The Problem PrinterOn Solves

PrinterOn securely connects mobile or desktop users with printers no matter the networks in between.

Work is being shifted to all types of mobile devices from desktops. And with the shift comes an increase in demand for mobile printing. But mobile printing can be challenging. There are increased security requirements due to off-network printing, lack of mobile printing standards, and the basic inability in many cases for a mobile device to actually connect to the desired printer's network.

PrinterOn solves all these problems in a way that enforces an organization's security policies and does not require changes to its network, applications or devices.

# Why do industry leaders choose PrinterOn?

100+  
countries

24K  
customers

5M  
users

100M+  
pages  
printed

Unlike some who offer mobile print as an “add-on” or others who offer it but have limited product breadth and depth, PrinterOn’s single focus is secure mobile print in all its variations and implementations no matter the mobile device, the printer, the network, or the security measures.

PrinterOn’s unique and proven modular platform, now backed by the resourcing of Samsung Electronics, is the only platform available to handle all use cases on any network for any amount of users, small or large. Organizations choose PrinterOn to leverage industry-leading:

- security in submission, rendering and release including encryption in transit and at rest
- print job processing performance, even at scale
- flexibility in print submission and secure release methods
- deployment flexibility including on-premise, public cloud and private cloud
- high-availability configurations and global deployments

## PrinterOn’s Class-leading Features

<b>Mobile device and printer agnostic</b>	Support for all printer manufacturers. Support for all mobile device types, especially beneficial in a “BYOD” environment.
<b>Mobile apps for iOS and Android</b>	Robust and secure, the PrinterOn mobile apps are unsurpassed in their ability to allow users to find and securely print to public or private printers based on geolocation, keywords, or authentication.
<b>Remote printing</b>	PrinterOn securely connects print requests submitted from a device on one network to physical printers on a completely disconnected network, with or without secure release, even from desktop computers and even to home printers.
<b>PrintWhere®</b>	A complete secure print rendering and submission system for Windows-based devices including desktops, laptops, and Surface tablets
<b>Secure Release Anywhere™</b>	PrinterOn’s pull print implementation which gives users the flexibility to choose an output device at the time of print release instead of print submission. Reduces print waste when combined with secure release.
<b>Robust MDM support</b>	Deep integration with industry MDM leaders such as AirWatch, Good, and MobileIron mean that you can control PrinterOn mobile app deployment as well as app behavior.

# Providing mission critical printing for the Healthcare industry.

**Who:** Pegasus, a worldwide leader in storage solutions for healthcare organizations

**Problem:** They needed a way to print from the Pegasus application and enable remote printing to hospital locations

**Solution:** They chose PrinterOn Hosted to enable cloud printing via email and eliminated expensive VPN connections at remote locations

[www.printeron.com/hosted](http://www.printeron.com/hosted)

*"Before PrinterOn, we were using HP ePrint which did not meet the printing requirements for a mission critical warehouse management solution. PrinterOn gave us the guaranteed delivery we were looking for while remaining cost effective as compared to the custom solution we would have had to develop on our own."*

**Pegasus Medical Concepts**

# Secure mobile printing for employees in Manufacturing.

**Who:** QST Industries is the world's largest supplier of quality construction components to the apparel industry

**Problem:** They needed a way to make printing easy from any device to corporate printers and while traveling for business

**Solution:** PrinterOn Express was deployed to enable mobile print from any device at any corporate location or at hotels that have the PrinterOn service

[www.printeron.com/express](http://www.printeron.com/express)

*"We selected PrinterOn because it is a great fit for our secure mobile printing needs. From printing at our corporate offices and overseas plants, to printing at hotels where employees stay when traveling, PrinterOn delivers the mobile printing experience we had in mind from the beginning."*

**Don Mungovan, VP Global Information Technologies**

# Enabling students to print from Chromebooks.

**Who:** The Eaton School District in Colorado comprises 5 five schools and 1700 students

**Problem:** Printing directly from Google Cloud Print was not reliable and frustrating to students and staff. IT was spending too much time dealing with problems and paper and toner were being wasted

**Solution:** They chose PrinterOn Enterprise to provide them with a reliable way to use Chromebooks and their Gmail system with Google Cloud Print to print reliably and securely while reducing paper and toner usage

[www.printeron.com/enterprise](http://www.printeron.com/enterprise)

*"With PrinterOn's Enterprise printing, students can now use cloud printing capabilities to print from their Chromebooks and we can pass user credentials to our print management system to limit wasteful printing, keeping expenses down."*

# Providing mobile print for library patrons.

**Who:** The award-winning Las Vegas-Clark County Library District serves 1.5 million people over 8,000 square miles through its 25 branch libraries

**Problem:** Patrons could only print from laptops using an internal print management system and couldn't use their own devices

**Solution:** They deployed PrinterOn Hosted with PayPal integration at 13 branches to enable patrons to print from their own mobile devices or laptops.

[www.printeron.com/hosted](http://www.printeron.com/hosted)

*"We found PrinterOn through a web search along with some other solutions. After a bit of research, we decided on PrinterOn because they are the leader in mobile printing solutions. We did an evaluation and found that PrinterOn gave us the BYOD printing functionality patrons were asking for, the ability to print from their own mobile devices."*

**Patricia Marvel, Director of Marketing & Community Relations**
