Secure Mobile Printing for Any Organization

Since 2001, PrinterOn® has been delivering secure mobile printing solutions. We understand the challenges faced by businesses worldwide such as security, authentication, print management, disparate networks and BYOD. PrinterOn Enterprise and Express have been designed to meet the diverse printing requirements of any organization and ensure documents are printed and managed within your network regardless of device, printer, network or geographic location.

PrinterOn and MobileIron - Secure End-to-End Mobile Printing

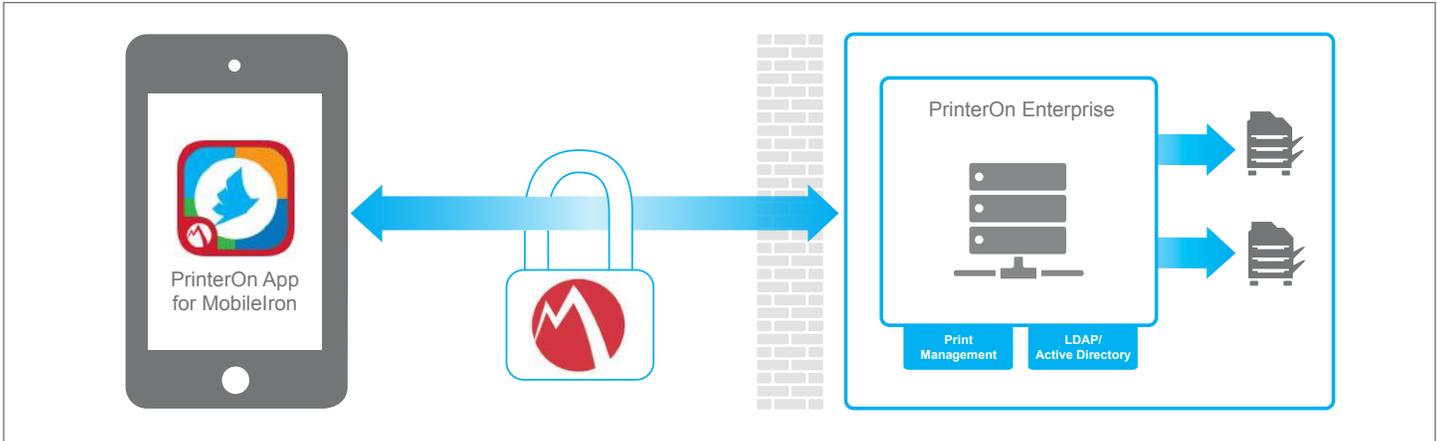

Leverage your investment in MobileIron by giving users access to secure print from anywhere. The PrinterOn for MobileIron app available for iOS is certified by MobileIron and provides a secure way to print from any mobile device to any enabled printer on the corporate network. Empower your employees to print from anywhere and stay productive.

Features of the app:

- Release codes for secure document release
- LDAP/AD user authentication
- Automatic discovery of printers regardless of network or location
- Find nearest print location using GPS, keyword, QR code
- Print most common files as well as photos and web pages
- Print from cloud storage like iCloud, Box or Google Drive
- Access over 10,000 public print locations worldwide

The PrinterOn Integration with MobileIron

Features of Solution	Benefits
End-to-end mobile printing security. No documents ever leave the trusted network.	PrinterOn security has been validated by some of the largest and most security-conscious companies in the world. It will likely meet or exceed your security policies too.
Remote Printing Capability	Enables secure printing from one network to another network, even if the networks are not connected to each other. Eliminates the need for costly VPN or network re-architecting.
Corporate Office-Home Office (CoHo) Support	Enables secure mobile printing to home office printers that are part of the secure corporate network without using VPN. Preserves full job authentication and accountability in existing print management systems.
SAP and Oracle workflows	Supports native integration into SAP and Oracle application workflows without changing the user experience or adding expensive and cumbersome workarounds.

Contact PrinterOn today to learn more about how we can provide secure mobile print for your organization.
